February 21, 2018

Summarize

we have 791022 weight records from 32535 user.

Data Missing/Incorrect Analyze

1. Brithday Incorrect

0.4988781% of user have incorrect brithdate.

Can a normal user register the account/membership without having a reasonable brithday?

If yes, how we deal with their brithdate data? (default value? NULL?)

If no, why we have so many incorrect brithdate data in DB.

2. First Weight Incorrect

0% of user have incorrect first weight. Great. Each user has at least one record with first weight in.

3. Gender

0.0073767% of user has no gender data. 0% of user have both male and female show in data base.

3. Weight record date missing

0.9177457% of records contains weight data.
